

Overcoming Threats to Health

MUFG's recognition

- Innovation in the healthcare sector will contribute to improvement in social and economic resilience.
- The sustainability of economic activities will be largely dependent on the strengthening of capabilities for preventing novel infectious viruses from spreading (via the development of vaccines, etc.) and responsiveness to the pandemic (via the development of medical technologies and institutions) in order to ensure robust social functions in anticipation of the further aging of population.

Main initiatives

- Assist in the development of healthcare-related technologies via the use of a fund and other frameworks for supporting growing businesses (including collaboration with large corporations)
- Support healthcare-related organizations and the R&D of vaccines by engaging in donations and other social contribution activities

□ Opportunities ■ Risks ▣ Opportunities and risks

Pick Up

Support for the Development of New Industries in the Life Science Field

- Invested in Orizuru Therapeutics Inc* as a major shareholder to **support the commercialization and social application of iPS cell technology** and **the development of new industries**.
- **Contributed to the development of the life science field**, which is an important theme in dealing with the aging population and low birthrate, and in realizing a healthy and long-lived society.

* An R&D-oriented company specializing in the development of regenerative medicine products derived from iPS cells and the utilization of iPS cell technology, which were established in April 2021 as a joint venture of Kyoto University Innovation Capital Limited and Takeda Pharmaceutical Company Limited.

Response to Prevent the COVID-19 Pandemic

Provision of insurance

The MUFG Park will open in 2023

Refresh the Mind and Body in a Lush Green Area

As part of the efforts to realize a sustainable environment and society, MUFG is going to open the Musashino Sports Ground, a sport facility that MUFG owns in Nishitokyo City, Tokyo, **to the public as MUFG Park** (tentative name) (scheduled to open in June 2023).

MUFG Park, which will cover a total area of approximately six hectares, will consist of three concept areas.

- **Nature:** A precious green environment in the heart of the large city
- **Sports:** Sports and health promotion environment consists of tennis courts and grounds etc.
- **Communication:** Community library, lawn, and other social and recreational environments

To Empower Our Communities and Society

- **Preservation and inheritance of precious natural values** in the heart of a large city
- **Creation of resilient communities and societies**
- **Support for the construction of communities** that are compatible with an era of living with COVID-19 and after

MUFG is committed to resolving the diverse issues of communities and society that need to be addressed for the future. When we transmit the experience and value we have cultivated to society, it will be **power for the community and society to take the next step forward.**
