① Gross profits (FX impact: approx. +¥55.0bn)

- Increased YoY, driven by the effects of overseas acquisitions, the capture of rising JPY interest rates, improved interest income including benefits from last year's bond portfolio rebalancing, increased fee revenues mainly from domestic and overseas loan and solution-related services, and lower bond sales losses

② G&A expenses (FX impact: approx. +¥30.0bn)

- Increased YoY, due to overseas acquisitions, inflation and the execution of strategic investments for the growth, while the expense ratio improved

③ Total credit costs

- Remained within the initial outlook range, despite large builds and reversals of loan loss provisions

④ Net gains (losses) on equity securities

- Decreased due to the absence of large gains in the prior year

⑤ Equity in earnings of equity method investees

- Increased YoY, led by solid performance of Morgan Stanley

⑥ Profits attributable to owners of parent

- Achieved historical high record of 1-3Q net income
- Progress toward the full-year target of ¥2.1tn revised upward in the interim results remains solid at 86.4%
