Group Business Management

Business Management Framework

MUFG has adopted a group organizational structure that features cross-integration along functional lines to deliver valuable financial products and services for a wide range of customers' needs. MUFG has established business groups across the group companies: Retail Banking, Corporate Banking, Global Banking, Trust Assets, and Global Markets. Under this business group framework, we develop and promote group-wide business initiatives along with a unified strategy and providing seamless services in a timely manner.

Risk-Return Management

In order to improve the group-based risk profile, to earn an appropriate amount of profits, and to allocate managerial resources properly, MUFG compiles an "Economic Capital Allocation Plan" in which it allocates economic capital, matching the sum of various types of risk exposures calculated by an internal risk measurement model, to each business group, each subsidiary, and each risk category.

In addition, in order to comply with the Basel III regulatory capital regulations, MUFG introduced "Risk-Weighted-Asset (RWA) plan," and controls risk takings by segment.

MUFG has also introduced business management indicators (ROEC*, RORA*, etc.) to assess and manage profitability against risk takings, aiming to heighten capital efficiency on a group basis.

Glossary of terms:

- **ROEC (Return on Economic Capital)**

A ratio calculated by dividing the net income of each business group by its amount of allocated capital. MUFG uses ROEC to pursue efficient use of allocated capital distributed to respective business groups.

- **RORA (Return on Risk Asset)**

A ratio calculated by dividing the net income of each business group by its amount of risk-weighted assets. MUFG uses RORA to pursue profitability and efficiency that are commensurate with risk-weighted assets.

Net Operating Profits/Risk-Weighted Assets By Business Group

Billions of yen

	Retail Banking	Corporate Banking	Global Banking	Trust assets	Global Markets	MUFG consolidated total
Net operating profits (Note 1)	225.3	422.2	482.5	60.9	369.1	1,395.8
Change from fiscal 2015	(61.3)	(38.1)	24.4	(9.3)	(58.4)	(155.2)
Risk-weighted assets (Note 2)	10,315.5	29,920.1	43,484.9	1,215.6	11,724.8	113,986.3
Change from March 31, 2016	(137.8)	(1,068.6)	797.3	(67.5)	1,119.1	1,922.0
Credit risks	8,931.3	28,872.2	40,785.7	610.5	8,695.8	96,906.3
Change from March 31, 2016	(91.3)	(993.2)	552.5	(25.1)	1,102.2	1,534.0
Market risks	17.0	92.1	16.4	168.2	2,375.0	2,135.7
Change from March 31, 2016	5.4	28.3	(7.7)	(34.7)	(10.3)	(62.9)
Operational risks	1,367.2	955.6	2,682.7	436.8	654.0	6,734.5
Change from March 31, 2016	(51.9)	(103.7)	252.6	(7.5)	27.1	153.4

Notes: 1. Managerial figures based on settlement rates. Corporate Banking excludes overseas Japanese corporate business. The consolidated total for MUFG includes figures from head office and others.

2. Risk-weighted assets by business group are managerial figures that are broken down financial accounting figures.

Overview of Internal Capital Adequacy Assessment Process

The holding company regularly assesses its internal capital adequacy from two perspectives: regulatory capital, based on capital adequacy regulations (Basel III), and its own economic capital, based on internal risk assessment.

In assessing internal capital adequacy based on regulatory capital, the holding company confirms that it is maintaining sufficient capital both at the current time and in terms of what will be required in the future, calculating the Common Equity Tier 1 ratio, the Tier 1 ratio, and the total capital ratio using capital and risk-adjusted assets as stipulated in the capital adequacy regulations. At the same time, the holding company confirms that it is maintaining appropriate capital relative to risk using the benchmark of a "Common Equity Tier 1 ratio of at least 9.5%," which has been designated from the perspective of risk management and is included as a target in the Group's medium-term business plan.

An internal capital adequacy assessment based on economic capital is carried out within the framework of the capital allocation system, which allocates capital to credit risk, strategic equity portfolio risk, market risk, and operational risk.

Credit concentration risk and interest rate risk in the banking book, as stipulated by the Second Pillar of Basel, are included in these risks. The method of calculating each risk under the capital allocation system uses the basic assumptions of a confidence level of 99.9% and a holding period of one year to enhance consistency with Basel III. The capital allocation plan is formulated after assessing internal capital adequacy by comparing the total risk amount, taking into account the effect of risk diversification, with total capital (Tier 1 capital + Tier 2 capital). Thereafter, internal capital adequacy is monitored on an ongoing basis by regularly checking the use of allocated capital versus the plan and the amount of allocated capital versus total capital.

Both the regulatory capital plan and the economic capital plan are stress-tested and are prepared based on a detailed analysis of the impact on capital and risk as well as an assessment of internal capital adequacy.

The same framework for the assessment of internal capital adequacy used at the holding company is applied at the Group's two main banks: The Bank of Tokyo-Mitsubishi UFJ, Ltd. and Mitsubishi UFJ Trust and Banking Corporation.

Required Regulatory Capital Adequacy Levels

	March 2013	March 2014	March 2015	March 2016	March 2017	March 2018	March 2019 and beyond
Common Equity Tier 1 ratio	3.5	4.0	4.5	5.5	6.5	7.5	8.5
Tier 1 ratio	4.5	5.5	6.0	7.0	8.0	9.0	10.0
Total capital ratio	8.0	8.0	8.0	9.0	10.0	11.0	12.0

Note: Based on a G-SIB surcharge of 1.5%, the required level assuming a countercyclical buffer of 0.00%.

Common Equity Tier 1 Ratio Requirements

*1 G-SIB surcharge

This surcharge is an additional capital adequacy requirement placed on financial institutions designated as global systemically important financial institutions. The designation of covered financial institutions and the surcharge rates are updated annually. The 1.5% shown in the accompanying chart is the surcharge rate announced in 2016 that is expected to be required of MUFG.

*2 Capital conservation buffer

This buffer seeks to maintain capital that can be drawn upon during times of stress, and banks are required to hold this buffer to avoid falling below minimum regulatory capital levels. The required buffer is 2.5% of risk-weighted assets on a Common Equity Tier 1 capital basis. In the event that the levels shown in the chart cannot be maintained, certain restrictions would be imposed on measures associated with the distribution of capital, such as the payment of dividends or the repurchase of shares.

Overview of Stress Testing Process

(1) Development of Stress Testing Scenarios

Develop several scenarios taking into account such factors as our risk profile and underlying macroeconomic environment.

- Worst-case scenarios expected once in 5–10 years and worst-case scenarios expected once in 20–25 years are developed in principle and some additional scenarios are developed where necessary.

Prepare macroeconomic variables for the testing horizon under each scenario.

- Macroeconomic variables include GDP, TOPIX, JGB yield, dollar-yen exchange rate, euro-yen exchange rate, unemployment rate, CPI, and others.

(2) Review and Approval Process of the Scenarios

Scenarios developed under process (1) are reviewed by our internal committee and ultimately approved by our Group Chief Risk Officer.

(3) Estimation of Financial Impact

Estimate stress impacts on major assets and income based on the scenarios approved in process (2).

- Major items estimated include credit cost, losses on write-down on equity securities, net gains/losses on equity securities, net interest income, risk-weighted assets, and others.

(4) Assessment of Capital Adequacy

Assess capital adequacy of both regulatory and economic capital, calculating the following ratios/amounts based on the stress impacts estimated in process (3).

- Regulatory Capital: Common Equity Tier 1 ratio, Tier 1 ratio, and total capital ratio
- Economic Capital: Capital margin (difference between total capital and total risk amount)

Stress testing results are reviewed by the Corporate Risk Management Committee.

Top Risk

MUFG and its major subsidiaries control risk by taking a preventative approach of identifying the top risks and establishing the necessary countermeasures in advance. If risks do materialize, the situation is managed so as to enable a flexible response. Moreover, senior management discusses top risk to share risk awareness and develop effective countermeasures.

Major top risks

Risks	Risk Scenarios* (examples)
Decline in Profitability (Including Decline in Profitability of Net Interest Income)	<ul style="list-style-type: none">Decline in profitability of net interest income due to negative interest rate policy.Decline in overall profitability due to constraints on balance sheet size caused by regulatory factors.
Risk of Foreign Currency Liquidity	<ul style="list-style-type: none">Depletion of foreign currency liquidity or significant increase in its cost due to deterioration of market conditions.
Increase in Credit Costs	<ul style="list-style-type: none">Globally, concerns about concentration risk may be heightened against the backdrop of low interest rates globally, the influx of money due to quantitative easing, and the tendency of financial institutions to chase yields. This may push up inter-risk correlation and sensitivity in the credit portfolio to an unprecedented degree, causing an increase in credit costs.
Risk of Information Technology	<ul style="list-style-type: none">Customer information leakage and reputational damage due to cyber-attack.Payment of compensation costs and reputational damage due to system failure.
Risk Associated with Money Laundering or Economic Sanctions	<ul style="list-style-type: none">Regulatory issues such as the infringement of anti-money laundering regulations or applicable regulations related to economic sanctions could lead to legal actions such as business suspension or civil fines, and reputational damage.

* The risk scenarios outlined in the above table are some of the risk scenarios discussed at the Corporate Risk Management Committee meeting in March 2017 and reported to the Board of Directors. Some of the scenarios are general ones and may not be unique to MUFG.

Concept of top risks

- Risks are defined as the losses that the Company would incur as a result of each risk scenario materializing. The materiality of a risk is determined based on the impact and probability of risk occurrence (external and internal factors).
- Risks that MUFG believes require priority attention over the next one year period are defined as top risks (including risk events having the potential to have a relatively high probability of occurrence. Moreover, including risks that are not only limited to the quantifiable ones, but those that could materially affect MUFG's business in the future because of possible adverse effects on MUFG's strategies or reputation).
- The Company creates a risk map to comprehensively grasp specified top risks, and makes use of it for preventative risk management.

Note: The table shown above only describes some of the risks that MUFG believes are material. Please note that other risks not identified in the above table could materially affect MUFG's operating results. Please refer to other disclosure materials such as Securities Report, Quarterly Securities Report, Form 20-F, and Form 6-K for more details on MUFG's and its subsidiaries' risk information.

Basel III Data (Consolidated)

In accordance with the provisions of Article 52-25 of the Banking Law of Japan, Mitsubishi UFJ Financial Group (MUFG) adopts the “International regulatory framework” to calculate its capital adequacy ratio based on formulas contained in the standards for the consolidated capital adequacy ratio of bank holding companies (Notification of the Financial Services Agency No. 20, 2006; referred to hereinafter as the “FSA Holding Company Capital Adequacy Notification”) to assess capital adequacy in light of the assets we own on a consolidated basis.

In accordance with the provisions of Article 52-25 of the Banking Law of Japan, MUFG adopts the “International regulatory framework” to calculate its consolidated liquidity coverage ratio based on the formulas contained in the standards for determining soundness in liquidity management, which are established as standards for a bank holding company to determine the soundness of management of bank holding companies and their subsidiaries and other entities, and should also be referred to in order to determine the soundness of bank management (Notification of the Financial Services Agency No. 62, 2014; referred to hereinafter as the “FSA Holding Company Liquidity Coverage Ratio Notification”).

With regard to the calculation of the consolidated capital adequacy ratio, MUFG received an independent audit by Deloitte Touche Tohmatsu (DTT) LLC in accordance with “Treatment of Inspection of the Capital Ratio Calculation Framework Based on Agreed-Upon Procedures” (JICPA Industry Committee Report No. 30). With regard to part of the internal controls structure governing calculation of the consolidated capital adequacy ratio, MUFG received a report from DTT LLC, which conducted certain procedures as deemed necessary by MUFG. The procedures conducted by the independent auditor were not part of an audit of the financial statements or an audit of internal controls, and we did not receive any audit opinion with regard to our internal controls structure governing the calculation of the consolidated capital adequacy ratio or the related consolidated capital adequacy ratio.

SCOPE OF CONSOLIDATION

Notes on the scope of consolidation

Differences between those companies belonging to the corporate group (hereinafter, the “holding company group”) to which the calculation of consolidated capital adequacy ratio as stipulated in Article 3 of the FSA Holding Company Capital Adequacy Notification is applicable and those companies that are included in the scope of consolidation for accounting purposes	Paragraph 1 of Article 3 of the FSA Holding Company Capital Adequacy Notification states that “the provisions of Paragraph 2 of Article 5 of the Japanese regulations pertaining to consolidated financial statements shall not apply” to “financial subsidiaries” of a bank holding company. Moreover, Paragraph 2 of the said Article 3 states that “insurance-related subsidiaries” of a bank holding company “shall not be included in the scope of consolidation.” In addition, with regard to affiliated companies engaged in financial operations, the FSA Holding Company Capital Adequacy Notification states that, provided certain conditions are met, such companies “can be included in the scope of consolidation and in the calculation of the consolidated capital adequacy ratio using pro rata consolidation” (under which only those portions of the affiliated company’s assets, liabilities, income and expenditures that are attributable to the bank holding company or any consolidated subsidiaries with investments in the said affiliated company are included in the scope of consolidation). MUFG Group had no companies to which the above exception applied as of March 31, 2016, or March 31, 2017, and there were no differences between those companies belonging to the “holding company group” and those companies that are included in the “scope of consolidation for accounting purposes.”
Number of consolidated subsidiaries, and names and principal businesses of major consolidated subsidiaries of the holding company group	224 companies as of March 31, 2016; 213 companies as of March 31, 2017 The Bank of Tokyo-Mitsubishi UFJ, Ltd. (banking business), Mitsubishi UFJ Trust and Banking Corporation (trust/banking business), Mitsubishi UFJ Securities Holdings Co., Ltd. (securities business), etc.

<p>Number of affiliated companies engaged in financial operations which are subject to Article 9 of the FSA Holding Company Capital Adequacy Notification, and names, amounts of total assets and net assets shown on the balance sheet, and principal businesses of affiliated companies engaged in these financial operations</p>	<p>Not applicable as of March 31, 2016 and 2017</p>
<p>Names, amounts of total assets and net assets shown on the balance sheet, and principal businesses of companies belonging to the holding company group that are not included in the scope of consolidation for accounting purposes, and of companies not belonging to the holding company group but included in the scope of consolidation for accounting purposes</p>	<p>Not applicable as of March 31, 2016 and 2017</p>
<p>Outline of restrictions on transfer of funds or equity capital within the holding company group</p>	<p>As of March 31, 2016 and 2017, transfer of funds or capital within the MUFG Group is conducted with all due consideration given to the appropriateness of each action. We give priority in ensuring that each group company maintains sufficient capital level for legal and regulatory compliance purposes. Care is also taken to ensure that actions do not compromise sound and proper operations, while eliminating negative effects on payment capacity, liquidity or profitability.</p>

Companies that are deficient in regulatory capital and total regulatory capital deficiencies

<p>Names of any other financial institutions, etc., classified as subsidiaries or other members of the bank holding company that are deficient in regulatory capital, and corresponding total regulatory capital deficiencies</p>	<p>Not applicable as of March 31, 2016 and 2017</p>

Note: Capital instruments, approved by the commissioner of Japanese Financial Services Agency, subject to the provision to Paragraph 12 of Article 8 of the notification of Japanese Financial Services Agency No. 20, 2006, hereinafter referred to as the "FSA Holding Company Capital Adequacy Notification," are excluded from the calculation of figures stipulated in Paragraph 8, 9-1, and 10-1 of Article 8 of FSA Holding Company Capital Adequacy Notification, for 10 years from March 31, 2013 to March 30, 2023. The approved amount will decrease by 20% each year from March 31, 2019. The amount approved at the end of March, 2016 is ¥1,466,112 million and the amount approved at the end of March, 2017 is ¥1,477,185 million.

Explanation on reconciliation between balance sheet items and regulatory capital elements (March 31, 2016 and 2017)

Notes: 1. The amounts in the "Composition of capital disclosure" are based on those before considering transitional arrangements and include "Amounts excluded under transitional arrangements" disclosed in "Composition of Capital Disclosure" as well as the amounts included in regulatory capital. In addition, items included in regulatory capital under transitional arrangements are excluded from this table.
2. As of March 31, 2016 and 2017, the regulatory scope of consolidation was the same as the accounting scope of consolidation.

1. Shareholders' equity

(1) Consolidated balance sheet

				<i>Millions of yen</i>
Consolidated balance sheet items	March 31, 2016	March 31, 2017	Remarks	
Capital stock	2,141,513	2,141,513		
Capital surplus	1,425,637	1,412,087		
Retained earnings	8,587,578	9,278,546		
Treasury stock	(298,922)	(513,260)		
Total shareholders' equity	11,855,806	12,318,885		

(2) Composition of capital

				<i>Millions of yen</i>
Composition of capital disclosure	March 31, 2016	March 31, 2017	Remarks	Basel III Template No.
Directly issued qualifying common share capital plus related capital surplus and retained earnings	11,855,806	12,318,885	Shareholders' equity attributable to common shares (before adjusting national specific regulatory adjustments (earnings to be distributed))	
Capital and capital surplus	3,567,150	3,553,600		1a
Retained earnings	8,587,578	9,278,546		2
Treasury stock	(298,922)	(513,260)		1c
Other than above	—	—		
Directly issued qualifying Additional Tier 1 instruments plus related capital surplus classified as equity under applicable accounting standards and its breakdown	—	—	Shareholders' equity attributable to preferred shares with a loss absorbency clause upon entering into effective bankruptcy	31a

2. Intangible fixed assets

(1) Consolidated balance sheet

Millions of yen

Consolidated balance sheet items	March 31, 2016	March 31, 2017	Remarks
Intangible fixed assets	1,254,727	1,257,876	
Securities	69,993,869	59,438,897	
Goodwill attributable to equity-method investees	148,690	166,472	Goodwill attributable to equity-method investees
Income taxes related to above	277,419	291,501	Income taxes related to intangibles other than goodwill and mortgage servicing rights

Description of agreements concerning methods of procuring capital

Details are shown on the MUFG website (Please see <http://www.mufg.jp/english/ir/basel3/>)

CAPITAL ADEQUACY

Capital requirements for credit risk

Billions of yen

	March 31, 2016	March 31, 2017
Capital requirements for credit risk (excluding equity exposures under the IRB Approach and exposures relating to funds (Note 3))	6,899.1	6,715.3
IRB Approach (excluding securitization exposures)	4,748.4	4,598.6
Corporate exposures (excluding specialized lending exposures subject to supervisory slotting criteria)	3,520.5	3,427.9
Corporate exposures (specialized lending exposures subject to supervisory slotting criteria)	27.8	31.4
Sovereign exposures	80.8	83.6
Bank exposures	203.9	171.4
Residential mortgage exposures	394.3	374.7
Qualifying revolving retail exposures	184.4	183.7
Other retail exposures	148.1	136.4
Exposures related to unsettled transactions	0.1	1.1
Exposures for other assets	188.2	188.2
Standardized Approach (excluding securitization exposures)	1,975.5	1,949.2
Securitization exposures (Note 4)	175.2	167.4
Portfolios under the IRB Approach	157.8	149.3
Portfolios under the Standardized Approach	17.3	18.1
Capital requirements for credit risk of equity exposures under the IRB Approach	1,073.2	1,172.0
Market-Based Approach (Simple Risk Weight Method) (Note 5)	141.6	165.3
Market-Based Approach (Internal Models Method) (Note 5)	—	—
PD/LGD Approach (Note 5)	749.1	790.5
Exposures related to specific items related to components not included in survey items	182.4	216.1
Capital requirements for exposures relating to funds	193.0	236.9
Required capital for CVA risk	425.0	497.0
Required capital for credit risk associated with exposures relating to central counterparty clearing houses	34.2	57.1
Total	8,624.6	8,678.5

Notes: 1. Credit risk-weighted assets were calculated using the AIRB Approach. However, as an exemption to this approach, the Standardized Approach is used for calculations with credit risk-weighted assets at some subsidiaries in cases where the figures for such subsidiaries are expected to be minor compared with the total. The IRB Approach is planned to be applied by staggered rollout for the three companies MUFG Americas Holdings Corporation, Bank of Ayudhya Public Company Limited, and Bank of Tokyo-Mitsubishi UFJ (China), Ltd. Since the Basel Committee on Banking Supervision is currently examining comprehensive revisions to regulations on capital adequacy ratio, the timing at which these applications shall take effect shall be decided in line with the direction of new regulations.

2. Capital requirement for portfolios under the IRB Approach is calculated as "credit risk-weighted asset amount x 8% + expected losses." In this calculation, the credit risk-weighted asset amount is multiplied by the scaling factor of 1.06. Capital requirements for portfolios under the Standardized Approach are calculated as "credit risk-weighted asset amount x 8%."

3. Exposures to calculate the amount of credit risk-weighted assets as stipulated in Article 145 of the FSA Holding Company Capital Adequacy Notification.

4. Including amounts equivalent to the increase in equity capital resulting from a securitization exposure, as regulatory adjustments applied to equity capital.

5. Exposures to calculate the amount of credit risk-weighted assets as stipulated in Article 144 of the FSA Holding Company Capital Adequacy Notification.

Capital requirements for market risk*Billions of yen*

	March 31, 2016	March 31, 2017
Standardized Approach	54.0	85.7
Interest rate risk	26.6	52.4
Equity position risk	20.7	29.0
Foreign exchange risk	6.4	4.2
Commodity risk	0.1	0.0
Options transactions	–	–
Internal Models Approach	121.8	85.1
Total	175.8	170.8

Note: As for market risk, the Internal Models Approach is mainly adopted to calculate general market risk (in some cases the Standardized Approach is adopted) and the Standardized Approach is adopted to calculate specific risk.
Stressed value-at-risk is included in the market risk equivalent amount based on the Internal Models Approach.

Capital requirements for operational risk*Billions of yen*

	March 31, 2016	March 31, 2017
Advanced Measurement Approach	359.0	364.3
Standardized Approach	–	–
Basic Indicator Approach	167.4	174.4
Total	526.4	538.7

Note: Operational risk was calculated using the Advanced Measurement Approach and Basic Indicator Approach.

Consolidated total capital requirements*Billions of yen*

	March 31, 2016	March 31, 2017
Consolidated total capital requirements	8,965.1	9,118.9
8% of credit risk-weighted assets	7,629.7	7,752.5
8% of the amount included in risk weighted assets using transitional arrangements	24.4	14.9
Capital requirements for market risk	175.8	170.8
Capital requirements for operational risk	526.4	538.7
8% of the amount by which the capital floor value, which is obtained by multiplying the risk-weighted asset amount as calculated according to the Former Notification (Note) by a predetermined adjustment factor, exceeds the risk-weighted asset amount as calculated according to the FSA Holding Company Capital Adequacy Notification	632.9	656.7

Note: Hereafter, this refers to Ministry of Finance (MOF) Notification No. 62, 1998, which was based on the provisions of Article 52-25 of the Banking Law of Japan.

Notes: 1. Figures for credit risk-weighted assets (RWA) are presented on a Basel III full implementation basis. Credit RWA under the transitional basis was ¥95,372.3 billion as of March 31, 2016 and ¥96,906.3 billion as of March 31, 2017.

2. The validity of risk parameters such as probability of default, or PD, loss given default, or LGD, or Exposure at Default, or EAD, are verified regularly (at least once a year) through back testing or comparative analysis with external sources.

3. The corresponding external credit ratings are presented in terms of rating symbols from S&P and Moody's.

Allowance for loans to specific foreign borrowers	318	(896)	388	69
Total	1,057,585	61,801	957,350	(100,235)

Notes: 1. Although the specific allowance for credit losses does not include the allowance relating to any securitization exposures and exposures relating to funds, the allowance relating to these exposures is not excluded from both the general allowance for credit losses and the allowance for loans to specific foreign borrowers, owing to the fact that MUFG does not manage provisioning with respect to each asset class based on Basel III.

2. Industry classifications apply primarily to allowances related to exposures held by The Bank of Tokyo-Mitsubishi UFJ and Mitsubishi UFJ Trust and Banking (both on a non-consolidated basis). The bulk of provisions relating to exposures held by other subsidiaries is included in the "Others" category.

Notes: 1. Figures exclude specialized lending exposures subject to supervisory slotting criteria and any exposures relating to funds.

2. Weighted average PD and weighted average LGD represent weighted average figures based on EAD.

3. RW stands for risk weight. Risk weight is calculated by dividing the amount of credit risk-weighted assets by EAD, and does not include any expected losses. Note that credit risk-weighted asset amounts are multiplied by 1.06.

Estimated weighted average LGD	32.82%	37.39%	33.35%	90.00%	32.98%	77.36%	25.69%
Interim FY2016: Discussion of the factors	Actual losses on exposures were lower than initial estimated losses, reflecting repayments on defaulted exposures and other factors such as loan normalization.						

Notes: 1. Actual losses include the following amounts related to defaulted exposures: write-offs against allowances, losses on the disposal of claims, debt forgiveness or loan waivers, and impairment losses on securities. Actual losses incurred by Mitsubishi UFJ Trust and Banking Corporation equal the aggregate figures for the banking account and for trust accounts for which repayment of the principal to the customers is guaranteed.
2. Estimated losses for interim FY2016 represent the anticipated losses for the full year estimated at the beginning of the fiscal year.

Note: Eligible financial collateral includes collateral for repo transactions but does not include deposits in our banks subject to on balance sheet netting.

DERIVATIVE TRANSACTIONS AND LONG SETTLEMENT TRANSACTIONS

Matters relating to counterparty credit risk

Billions of yen

	March 31, 2016	March 31, 2017
Aggregated gross replacement costs	11,049.4	9,841.1
Credit equivalent amounts prior to credit risk mitigation benefits due to collateral	8,591.9	7,924.2
Foreign exchange and gold	8,928.1	8,504.8
Interest rate	7,742.6	6,713.6
Equity	247.3	278.9
Precious metals (except gold)	–	–
Other commodities	115.4	50.4
Credit derivative	397.4	370.7
Long settlement transactions	0.3	6.2
Netting benefits due to close-out netting agreements (Note 2)	(8,839.5)	(8,000.6)
Collateral held	1,740.2	1,637.1
Deposits	1,141.0	1,193.8
Marketable securities	402.2	322.4
Others	196.8	120.7
Credit equivalent amounts after credit risk mitigation benefits due to collateral	7,854.4	5,479.4
Notional principal amount of credit derivatives included in calculation of credit equivalent amounts	6,387.5	5,914.2
Purchased credit protection through credit default swaps	3,266.8	3,096.6
Purchased credit protection through total return swaps	111.8	–
Purchased credit protection through credit options	–	–
Purchased other credit protection	–	–
Provided credit protection through credit default swaps	3,008.7	2,817.5
Provided credit protection through total return swaps	–	–
Provided credit protection through credit options	–	–
Provided other credit protection	–	–
Notional principal amount of credit derivatives used for credit risk mitigation purposes	919.3	829.6

Notes: 1. Credit equivalent amounts are calculated using the Current Exposure Method.

2. These benefits are equal to the figure obtained by subtracting credit equivalent amounts prior to credit risk mitigation benefits due to collateral from the sum of aggregated gross replacement costs and total gross add-ons.

Derivative transaction exposure

Billions of yen

	March 31, 2016	March 31, 2017
Derivative transactions not settled with central counterparty clearing houses	8,591.5	7,917.9
Derivative transactions settled with central counterparty clearing houses	3,743.9	4,243.3
OTC derivatives	3,370.9	3,862.8
Exchange traded derivatives	373.0	380.4
Total	12,335.4	12,161.3

Note: Figures in the above table show exposures used in the calculation of credit risk-weighted assets.

SECURITIZATION EXPOSURES (Subject to calculation of credit risk assets)

Information on underlying assets

Billions of yen

	March 31, 2016		FY2015		
	Amount of underlying assets at period-end (Note 1)		Cumulative amount of underlying assets in default or contractually past due 3 months or more		Losses on underlying assets incurred during this period (Note 4)

- Notes: 1. The amount of underlying assets relating to sponsor of ABCP programs includes underlying assets related to ABCP programs sponsored by multiple financial institutions, including certain consolidated subsidiaries of MUFG.
2. The amount of underlying assets refers only to those cases in which the securitization exposures associated with a securitization conducted during this period were wholly transferred to third parties.
3. Figures show cumulative totals for this period of underlying assets either in default or contractually past due 3 months or more arising from securitization transactions in cases where the securitization exposures associated with a transaction conducted during this period were wholly transferred to third parties, or where no exposure was retained at the end of this period from a securitization conducted during this period due to related maturity.
4. Losses with traditional or synthetic securitizations are based on the projected accounting losses for holding the underlying assets without conducting the relevant securitization. With regard to the sponsor of ABCP programs, since it is extremely rare for such schemes to result in losses on any related retained securitization exposure, it is difficult to obtain generally relevant information relating to losses as based on certain definitions. These figures therefore aggregate cases where actual economic losses have been recognized with cases where the loss has been valued on the same basis as the underlying defaulted assets. Losses on underlying assets relating to sponsor of ABCP programs differ from losses incurred by MUFG.

Notes: 1. The amount of securitization exposures that have been deducted from Tier 1 capital (amount equivalent to increase in capital) counts as common equity Tier 1 capital: regulatory adjustments as stipulated by Article 5 of the FSA Holding Company Capital Adequacy Notification, and includes any gains on disposal of the underlying assets relating to the securitization.

2. Figures listed refer to the amounts of exposures subject to a 1,250% risk weight as stipulated in Article 225 of the FSA Holding Company Capital Adequacy Notification. Securitization exposures subject to a 1,250% risk weight include cases where the credit risk-weighted assets computed using the Supervisory Formula exceed 1,250% or where a rating is lower than a certain threshold when calculating credit risk-weighted assets under the Ratings-Based Approach.

(Securitization exposures subject to early amortization provisions retained)

In line with the provisions of Articles 230 & 248 of the FSA Holding Company Capital Adequacy Notification, as of March 31, 2016 and 2017, there were no securitization exposures subject to early amortization treatment that are retained by external investors and are used to calculate credit risk-weighted assets.

(Amount of securitization exposures retained and the associated capital requirement for these exposures broken down into a number of risk weight bands)

Notes: 1. Investment securities in the above table comprise securities available-for-sale, securities being-held-to-maturity and trading securities that have a quoted market value.

2. Assets pledged represent securities pledged as collateral primarily for borrowings, bills sold, foreign exchange transactions, and futures transactions.

3. Figures in the above table do not represent high quality liquid assets under the Basel III regulatory regime.

4. Figures under MUFG reflect intergroup eliminations. Accordingly, these figures do not represent the sum of figures for the major operating entities.

5. The following abbreviations are used in the tables above:

MUFG = Mitsubishi UFJ Financial Group, Inc.

BTMU = The Bank of Tokyo-Mitsubishi UFJ, Ltd.

MUTB = Mitsubishi UFJ Trust and Banking Corporation

MUSHD = Mitsubishi UFJ Securities Holdings Co., Ltd.

Assumptions for VaR calculations:

Historical simulation method	
Holding period:	10 business days
Confidence interval:	99%
Observation period:	701 business days

- The maximum and minimum VaR overall and for various risk categories were taken from different days.
- Figures for stressed VaR are not included.

Stressed VaR: maximum, minimum and average values by disclosure period and period-end

Billions of yen

	FY2015				FY2016			
	Average	Maximum	Minimum	Mar. 31, 2016	Average	Maximum	Minimum	Mar. 31, 2017
Stressed VaR	19.01	36.76	10.64	21.54	23.49	57.11	10.32	10.32

Assumptions for VaR calculations:

Historical simulation method	
Holding period:	10 business days
Confidence interval:	99%

Stressed VaR has been measured from October 2011.

The amount of required capital related to additional risk and comprehensive risk as of the period-end, as well as the maximum, minimum and average values for the amount of required capital for additional risk and comprehensive risk during the disclosure period

Not applicable in fiscal 2015 and 2016.

Movement analysis of market risk-weighted assets

Market risk-weighted assets decreased by ¥0.06 trillion from March 31, 2016 mainly due to decreases in the VaR based on the Internal Models Approach.

	<i>Trillions of yen</i>
Market risk-weighted assets, previous period-end (March 31, 2016)	2.19
Internal Models Approach	(0.45)
VaR	(0.18)
Stressed VaR	(0.27)
Standardized Approach	+0.39
Interest rate risk	+0.26
Equity position risk	+0.10
Foreign exchange risk	(0.02)
Others	+0.05
Market risk-weighted assets, current period-end (March 31, 2017)	2.13

Results of market risk backtesting and explanations of any actual trading losses significantly in excess of VaR

Market Risk Backtesting

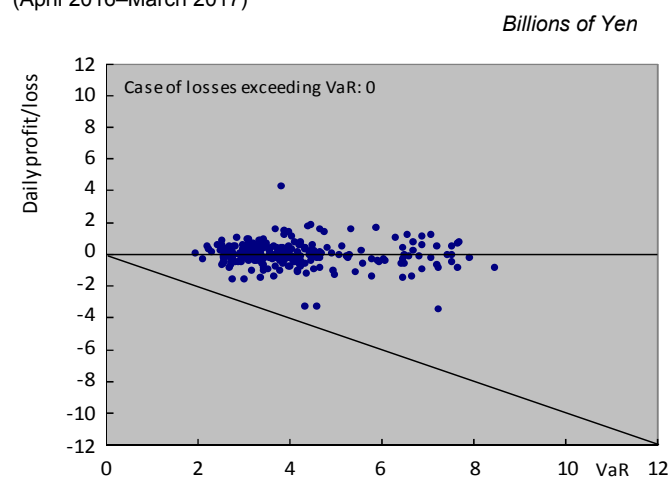

(April 2015–March 2016)

Note: Actual trading losses were within the range of VaR throughout the period studied.

Market Risk Backtesting

(April 2016–March 2017)

Note: Actual trading losses were within the range of VaR throughout the period studied.

VaR and Daily Profit/Loss for Trading Activities

(April 2015–March 2016)

Note: Actual trading losses were within the range of VaR throughout the period studied.

VaR and Daily Profit/Loss for Trading Activities

(April 2016–March 2017)

Note: Actual trading losses were within the range of VaR throughout the period studied.

OPERATIONAL RISK

Movement analysis of operational risk-weighted assets

Operational risk-weighted assets increased ¥ 0.15 trillion from March 31, 2016, reflecting an increase of ¥0.08 trillion due to an increase in gross profit at group companies based on the Basic Indicator Approach, and an increase of ¥0.06 trillion based on the Advanced Measurement Approach

	<i>Trillions of yen</i>
Operational risk-weighted assets, previous period-end (March 31, 2016)	6.58
Advanced Measurement Approach	0.06
Internal Fraud	0.03
External Fraud	0.04
Employment Practices and Workplace Safety	(0.03)
Clients, Products, and Business Practices*	(0.10)
Damage to Physical Assets	0.00
Business Disruption and System Failures	0.00
Execution, Delivery and Process Management	0.12
Basic Indicator Approach	0.08
Operational risk-weighted assets, current period-end (March 31, 2017)	6.73

* Includes loss on repayment of excess interest in the consumer finance operations of Group subsidiaries.

EQUITY EXPOSURES IN BANKING BOOK

Amount on consolidated balance sheet and market values

	March 31, 2016		March 31, 2017	
	Amount on consolidated balance sheet	Market value	Amount on consolidated balance sheet	Market value
Exposures to publicly traded equities (Note 1)	5,022.2	5,022.2	5,347.4	5,347.4
Equity exposures other than above (Note 2)	196.3	-	197.0	-
Total	5,218.6	-	5,544.4	-

Notes: 1. Figures only count Japanese and foreign equities held within securities available-for-sale with quoted market value.

2. Figures only count Japanese and foreign equities held within securities available-for-sale whose market values are not readily determinable.

Cumulative gains or losses arising from sales or write-offs of equity exposures

	FY2015			FY2016		
	Gains on sales	Losses on sales	Write-offs	Gains on sales	Losses on sales	Write-offs
Equity exposures	145,347	(31,656)	(25,384)	171,875	(44,378)	(2,557)

Note: Figures refer to net gains or losses on equity securities within net non-recurring gains or losses.

Unrealized gains or losses recognized on consolidated balance sheet but not on consolidated statement of income

Billions of yen

Assumptions for VaR calculations:

Historical simulation method	
Holding period:	10 business days
Confidence interval:	99%
Observation period:	701 business days

- The maximum and minimum VaR overall and for various risk categories were taken from different days.
- The equity-related risk figures do not include market risk exposure from our strategic equity portfolio.

INDICATORS FOR ASSESSING GLOBAL SYSTEMICALLY IMPORTANT BANKS (G-SIBs)

Billions of yen

Item No.	Description	As of March 31, 2016	As of March 31, 2017
1	Total exposures (= a + b + c + d): a. On-balance sheet assets (other than assets specifically identified below b., c. and contra-account of guarantees) (Note 1) b. Sum of counterparty exposure of derivatives contracts (Note 2), capped notional amount of written credit derivatives and potential future exposure of derivatives contracts (Note 3) c. Adjusted gross value of securities financing transactions (SFTs) and counterparty exposure of SFTs (Note 4) d. Gross notional amount of off-balance sheet items (other than derivatives contracts and SFTs) (Notes 5, 6)	310,677.2	317,835.1
2	Intra-financial system assets (= a + b + c + d): a. Funds deposited with or lent to other financial institutions and undrawn committed lines extended to other financial institutions b. Holdings of securities issued by other financial institutions (Note 7) c. Net positive current exposure of SFTs with other financial institutions (Note 8) d. Over-the-counter (OTC) derivatives (Note 9) with other financial institutions that have a net positive fair value (Note 8)	25,673.0	24,842.7
3	Intra-financial system liabilities (a + b + c): a. Deposits due to, and loans and undrawn committed lines obtained from, other financial institutions b. Net negative current exposure of SFTs with other financial institutions (Note 10) c. OTC derivatives (Note 9) with other financial institutions that have a net negative fair value (Note 10)	25,777.8	28,914.4
4	Securities outstanding (Note 7)	31,215.9	34,304.4
5	Assets under custody	203,070.2	203,709.8
6	Notional amount of OTC derivatives (Note 9)	1,458,368.1	1,447,432.6
7	Held-for-trading (HFT) securities and available-for-sale (AFS) securities, excluding HFT and AFS securities that meet the definition of Level 1 assets and Level 2 assets with haircuts (Note 11)	14,390.9	14,738.0
8	Level 3 assets (Note 12)	1,412.9	1,268.2
9	Cross-jurisdictional claims	90,086.1	84,491.8
10	Cross-jurisdictional liabilities	76,434.5	74,797.8

Item No.	Description	FY2015	FY2016
11	Payments (settled through the BOJ-NET, the Japanese Banks' Payment Clearing Network and other similar settlement systems, excluding intragroup payments)	9,278,395.7	9,487,927.1
12	Underwritten transactions in debt and equity markets (Note 13)	9,698.4	14,951.2

- Notes: 1. This refers to on-balance sheet assets other than assets specifically identified in the above Item 1, b., c. and contra-accounts of guarantees.
2. This refers to the sum of replacement costs calculated for derivatives contracts (any negative amounts are set to zero), add-ons calculated using the Current Exposure Method for derivatives contracts, and the notional principal amounts related to credit derivatives that provide protection.
3. This refers to forward, swap, option and other derivatives contracts and long settlement transactions as stipulated in Article 57, Paragraph 1 of the FSA Holding Company Capital Adequacy Notification.
4. This refers to the sum of cash receivables for SFTs and counterparty exposures calculated for each SFT (any negative amounts are set to zero).
5. Other than derivatives contracts and SFTs.
6. This refers to the sum of exposures related to the credit risk of counterparties, exposures related to eligible assets and securitization exposures.
7. Securities refer to secured debt securities, senior unsecured debt securities, subordinated debt securities, commercial paper, certificates of deposit, and common equities.
8. This refers only to non-negative amounts for which the effect of legally valid bilateral netting agreements can be determined.
9. OTC derivatives refer to derivatives that are not traded on a financial instruments market as defined in Article 2, Paragraph 14 of the Financial Instruments and Exchange Act or a foreign financial instruments market as defined in Article 2, Paragraph 8, Item 3 of the said Act.
10. This refers only to non-positive amounts for which the effect of legally valid bilateral netting agreements can be determined.
11. Level 1 and Level 2 assets with haircuts are defined in the Basel III Liquidity Coverage Ratio (LCR).
12. The amount is calculated in accordance with U.S. GAAP.
13. This refers to underwriting of securities defined in Article 2, Paragraph 8, Item 6 of the Financial Instruments and Exchange Act.

Consolidated Liquidity Coverage Ratio (4)	/	/	/	/
21 Total HQLA allowed to be included in the calculation	/	89,056,565	/	84,050,822
22 Net cash outflows	/	64,553,133	/	62,530,774
23 Consolidated liquidity coverage ratio (LCR)	/	137.9	/	134.4
24 The number of data used to calculate the average value		61		3

Note: The consolidated liquidity coverage ratio (LCR) is calculated by using the daily average value from the fourth quarter of the fiscal year ended March 31, 2017.

EVALUATION OF THE CONSOLIDATED LIQUIDITY COVERAGE RATIO LEVEL

MUFG's consolidated liquidity coverage ratio is well above the minimum requirement.

Minimum requirement for the consolidated liquidity coverage ratio

				%
	2016	2017	2018	After 2019
	70.0	80.0	90.0	100.0

MUFG does not expect the outlook for the consolidated liquidity coverage ratio to diverge significantly from the current level. The actual value of the consolidated liquidity coverage ratio does not differ significantly from the initial projection.

COMPOSITION OF THE TOTAL HQLA ALLOWED TO BE INCLUDED IN THE CALCULATION

There are no significant changes in the location and composition of the HQLA allowed to be included in the calculation in terms of currency, asset type and other attributes.

There are no significant currency imbalances between the total HQLA allowed to be included in the calculation and the net cash outflows in major currencies (currencies for which total liabilities denominated in any given currency account for 5% or more of MUFG's total liabilities on a consolidated basis).

OTHER MATTERS CONCERNING THE CONSOLIDATED LIQUIDITY COVERAGE RATIO

- MUFG has adopted the Special Provisions Pertaining to Qualifying Operational Deposits under Article 28 of the FSA Holding Company Liquidity Coverage Ratio Notification. The scope of application of the Special Provisions Pertaining to Qualifying Operational Deposits and the Valuation Method for Qualifying Operational Deposits are as follows.
 - Scope of application of the Special Provisions Pertaining to Qualifying Operational Deposits
MUFG has applied the Special Provisions Pertaining to Qualifying Operational Deposits to certain borrowings from the trust assets (trust accounts) of pension funds and other entities, as part of its custody services.
 - Valuation Method for Qualifying Operational Deposits
MUFG periodically conducts a valuation of qualifying operational deposits assuming a certain amount of deposits will remain in trust accounts.
- MUFG has not applied "the minimum required amount of additional pledged assets upon a change in fair value based on the Scenario Approach" on a consolidated basis, under Article 37 of the FSA Holding Company Liquidity Coverage Ratio Notification.
- MUFG has included cash outflows related to small consolidated subsidiaries in other contractual cash outflows under Article 59 of the FSA Holding Company Liquidity Coverage Ratio Notification.
- When calculating the consolidated liquidity coverage ratio (daily average value), daily data is not used for the following items, etc.
 - "Cash outflows related to small consolidated subsidiaries" of MUFG
Monthly or quarterly data is used.
 - Qualified current assets, financial outflow, and financial inflow for some overseas offices
Monthly data is used.
