In accordance with the provisions of Article 52-25 of the Banking Law of Japan, Mitsubishi UFJ Financial Group (MUFG) adopts the “International regulatory framework” to calculate its capital adequacy ratio based on formulas contained in the standards for the consolidated capital adequacy ratio of bank holding companies (Notification of the Financial Services Agency No. 20, 2006; referred to hereinafter as the “FSA Holding Company Capital Adequacy Notification”) to assess capital adequacy in light of the assets we own on a consolidated basis.

In accordance with the provisions of Article 52-25 of the Banking Law of Japan, MUFG adopts the “International regulatory framework” to calculate its consolidated liquidity coverage ratio based on the formulas contained in the standards for determining soundness in liquidity management, which are established as standards for a bank holding company to determine the soundness of management of bank holding companies and their subsidiaries and other entities, and should also be referred to in order to determine the soundness of bank management (Notification of the Financial Services Agency No. 62, 2014; referred to hereinafter as the “FSA Holding Company Liquidity Coverage Ratio Notification”).

With regard to the calculation of the consolidated capital adequacy ratio, MUFG received an independent audit by Deloitte Touche Tohmatsu (DTT) LLC in accordance with “Treatment of Inspection of the Capital Ratio Calculation Framework Based on Agreed-Upon Procedures” (JICPA Industry Committee Practical Guideline No. 30). With regard to part of the internal controls structure governing calculation of the consolidated capital adequacy ratio, MUFG received a report from DTT LLC, which conducted certain procedures as deemed necessary by MUFG. The procedures conducted by the independent auditor were not part of an audit of the financial statements or an audit of internal controls, and we did not receive any audit opinion with regard to our internal controls structure governing the calculation of the consolidated capital adequacy ratio or the related consolidated capital adequacy ratio.

## SCOPE OF CONSOLIDATION

### Notes on the scope of consolidation

Differences between those companies belonging to the corporate group (hereinafter, the “holding company group”) to which the calculation of consolidated capital adequacy ratio as stipulated in Article 3 of the FSA Holding Company Capital Adequacy Notification is applicable and those companies that are included in the scope of consolidation for accounting purposes	Paragraph 1 of Article 3 of the FSA Holding Company Capital Adequacy Notification states that “the provisions of Paragraph 2 of Article 5 of the Regulation on Consolidated Financial Statements shall not apply” to “financial subsidiaries” of a bank holding company. Moreover, Paragraph 3 of the said Article 3 states that “insurance-related subsidiaries” of a bank holding company “shall not be included in the scope of consolidation.” In addition, with regard to affiliated companies engaged in financial operations, the FSA Holding Company Capital Adequacy Notification states that, provided certain conditions are met, such companies “can be included in the scope of consolidation and in the calculation of the consolidated capital adequacy ratio using pro rata consolidation” (under which only those portions of the affiliated company’s assets, liabilities, income and expenditures that are attributable to the bank holding company or any consolidated subsidiaries with investments in the said affiliated company are included in the scope of consolidation). MUFG Group had no companies to which the above exception applied as of September 30, 2017, or September 30, 2018, and there were no differences between those companies belonging to the “holding company group” and those companies that are included in the “scope of consolidation for accounting purposes.”
Number of consolidated subsidiaries, and names and principal businesses of major consolidated subsidiaries of the holding company group	208 companies as of September 30, 2017; 215 companies as of September 30, 2018 MUFG Bank, Ltd. (banking business), Mitsubishi UFJ Trust and Banking Corporation (trust/banking business), Mitsubishi UFJ Securities Holdings Co., Ltd. (securities business), etc.
Number of affiliated companies engaged in financial operations which are subject to Article 9 of the FSA Holding Company Capital Adequacy Notification, and names, amounts of total assets and net assets shown on the balance sheet, and principal businesses of affiliated companies engaged in these financial operations	Not applicable as of September 30, 2017 and 2018

Names, amounts of total assets and net assets shown on the balance sheet, and principal businesses of companies belonging to the holding company group that are not included in the scope of consolidation for accounting purposes, and of companies not belonging to the holding company group but included in the scope of consolidation for accounting purposes	Not applicable as of September 30, 2017 and 2018
Outline of restrictions on transfer of funds or equity capital within the holding company group	As of September 30, 2017 and 2018, transfer of funds or capital within the MUFG Group is conducted with all due consideration given to the appropriateness of each action. We give priority in ensuring that each group company maintains sufficient capital level for legal and regulatory compliance purposes. Care is also taken to ensure that actions do not compromise sound and proper operations, while eliminating negative effects on payment capacity, liquidity or profitability.

**Companies that are deficient in regulatory capital and total regulatory capital deficiencies**

Names of any other financial institutions, etc., classified as subsidiaries or other members of the bank holding company that are deficient in regulatory capital, and corresponding total regulatory capital deficiencies	Not applicable as of September 30, 2017 and 2018

## Explanation on reconciliation between balance sheet items and regulatory capital elements (September 30, 2017 and 2018)

Notes: 1. The amounts in the "Composition of capital disclosure" are based on those before considering transitional arrangements and include "Amounts excluded under transitional arrangements" disclosed in "Composition of Capital Disclosure" as well as the amounts included in regulatory capital. In addition, items included in regulatory capital under transitional arrangements are excluded from this table.  
2. As of September 30, 2017 and 2018, the regulatory scope of consolidation was the same as the accounting scope of consolidation.

## EVALUATION OF THE CONSOLIDATED LIQUIDITY COVERAGE RATIO LEVEL

MUFG's consolidated liquidity coverage ratio is well above the minimum requirement.

### Minimum requirement for the consolidated liquidity coverage ratio

			%
	2017	2018	After 2019
	80.0	90.0	100.0

MUFG does not expect the outlook for the consolidated liquidity coverage ratio to diverge significantly from the current level. The actual value of the consolidated liquidity coverage ratio does not differ significantly from the initial projection.

## COMPOSITION OF THE TOTAL HQLA ALLOWED TO BE INCLUDED IN THE CALCULATION

There are no significant changes in the location and composition of the HQLA allowed to be included in the calculation in terms of currency, asset type and other attributes.

There are no significant currency imbalances between the total HQLA allowed to be included in the calculation and the net cash outflows in major currencies (currencies for which total liabilities denominated in any given currency account for 5% or more of MUFG's total liabilities on a consolidated basis).

## OTHER MATTERS CONCERNING THE CONSOLIDATED LIQUIDITY COVERAGE RATIO

1. MUFG has adopted the Special Provisions Pertaining to Qualifying Operational Deposits under Article 28 of the FSA Holding Company Liquidity Coverage Ratio Notification. The scope of application of the Special Provisions Pertaining to Qualifying Operational Deposits and the Valuation Method for Qualifying Operational Deposits are as follows.
  - a. Scope of application of the Special Provisions Pertaining to Qualifying Operational Deposits  
MUFG has applied the Special Provisions Pertaining to Qualifying Operational Deposits to certain borrowings from the trust assets (trust accounts) of pension funds and other entities, as part of its custody services.
  - b. Valuation Method for Qualifying Operational Deposits  
MUFG periodically conducts a valuation of qualifying operational deposits assuming a certain amount of deposits will remain in trust accounts.
2. MUFG has not applied "the minimum required amount of additional pledged assets upon a change in fair value based on the Scenario Approach" on a consolidated basis, under Article 37 of the FSA Holding Company Liquidity Coverage Ratio Notification.
3. MUFG has included cash outflows related to small consolidated subsidiaries in other contractual cash outflows under Article 59 of the FSA Holding Company Liquidity Coverage Ratio Notification.
4. When calculating the consolidated liquidity coverage ratio (daily average value), daily data is not used for the following items, etc.
  - a. "Cash outflows related to small consolidated subsidiaries" of MUFG  
Monthly or quarterly data is used.
  - b. High-quality liquid assets, cash outflows, and cash inflows for some overseas offices  
Monthly data is used.

## TOP RISK

MUFG and its major subsidiaries control risk by taking a preventative approach of identifying the top risks and establishing the necessary countermeasures in advance. If risks do materialize, the situation is managed so as to enable a flexible response. Moreover, senior management discusses top risk to share risk awareness and develop effective countermeasures.

### Major top risks

Risks	Risk Scenarios* (examples)
Decline in profitability (Including decline in profitability of net interest income)	<ul style="list-style-type: none"> <li>Decline in profitability of net interest income due to negative interest rate policy.</li> <li>Decline in overall profitability due to constraints on balance sheet size caused by regulatory factors.</li> </ul>
Risk of Foreign Currency Liquidity	<ul style="list-style-type: none"> <li>Depletion of foreign currency liquidity or significant increase in its cost due to deterioration of market conditions.</li> </ul>
Increase in Credit Costs	<ul style="list-style-type: none"> <li>As the real economy slows on a global basis, against a backdrop of central banks in America and Europe forming strategies for exiting monetary easing, the intensification of trade friction, the deterioration of the situation in the Middle East, and other factors, credit costs may increase in industries and regions where there is the potential risk of credit concentration.</li> </ul>
Risk of Information Technology	<ul style="list-style-type: none"> <li>Customer information leakage and reputational damage due to cyber-attack.</li> <li>Payment of compensation costs and reputational damage due to system failure.</li> </ul>
Risk Associated with Money Laundering or Economic Sanctions	<ul style="list-style-type: none"> <li>Regulatory issues such as the infringement of anti-money laundering regulations or applicable regulations related to economic sanctions could lead to legal actions such as business suspension or civil fines, and reputational damage.</li> </ul>

\* The risk scenarios outlined in the above table are some of the risk scenarios discussed at the Risk Committee meeting in October 2018 and reported to the Board of Directors. Some of the scenarios are general ones and may not be unique to MUFG.

### Concept of top risks

- Risks are defined as the losses that MUFG would incur as a result of each risk scenario materializing. The materiality of a risk is determined based on the impact and probability of risk occurrence (external and internal factors).
- Risks that MUFG believes require priority attention over the next one year period are defined as top risks (including risk events having the potential to have a relatively high probability of occurrence. Moreover, including risks that are not only limited to the quantifiable ones, but those that could materially affect MUFG's business in the future because of possible adverse effects on MUFG's strategies or reputation).
- MUFG creates a risk map to comprehensively grasp specified top risks, and makes use of it for forward-looking risk management.

Note: The table shown above only describes some of the risks that MUFG believes are material. Please note that other risks not identified in the above table could materially affect MUFG's operating results. Please refer to other disclosure materials such as Annual Securities Report, Quarterly Securities Report, Form 20-F, and Form 6-K for more details on MUFG's and its subsidiaries' risk information.

Required capital for CVA risk	363.1
Required capital for credit risk associated with exposures relating to central counterparty clearing houses	59.9
Total	8,063.8

- Notes: 1. Credit risk-weighted assets are calculated using the AIRB Approach. However, as an exemption to this approach, the Standardized Approach is used for calculations with credit risk-weighted assets at some subsidiaries in cases where the figures for such subsidiaries are expected to be minor compared with the total. The IRB Approach is planned to be applied by staggered rollout for the three companies MUFG Americas Holdings Corporation, Bank of Ayudhya Public Company Limited, and MUFG Bank (China), Ltd. Since the Basel Committee on Banking Supervision is currently examining comprehensive revisions to regulations on capital adequacy ratio, the timing at which these applications shall take effect shall be decided in line with the direction of new regulations.
2. Capital requirements for portfolios under the IRB Approach are calculated as “credit risk-weighted asset amount x 8% + expected losses.” In this calculation, the credit risk-weighted asset amount is multiplied by the scaling factor of 1.06. Capital requirements for portfolios under the Standardized Approach are calculated as “credit risk-weighted asset amount x 8%.”
3. Exposures to calculate the amount of credit risk-weighted assets as stipulated in Article 145 of the FSA Holding Company Capital Adequacy Notification.
4. Including amounts equivalent to the increase in equity capital resulting from a securitization exposure, as regulatory adjustments applied to equity capital.
5. Exposures to calculate the amount of credit risk-weighted assets as stipulated in Article 144 of the FSA Holding Company Capital Adequacy Notification.

FY2016: Actual losses on exposures were lower than initial estimated losses, reflecting repayments on defaulted exposures and other factors such as loan normalization.

Note: Actual losses include the following amounts related to defaulted exposures: write-offs against allowances, losses on the disposal of claims, debt forgiveness or loan waivers, and impairment losses on securities. Actual losses incurred by Mitsubishi UFJ Trust and Banking Corporation equal the aggregate figures for the banking account and for trust accounts for which repayment of the principal to the customers is guaranteed.

- Notes: 1. The amount of underlying assets relating to sponsor of ABCP programs includes underlying assets related to ABCP programs sponsored by multiple financial institutions, including certain consolidated subsidiaries of MUFG.
2. The amount of underlying assets refers only to those cases in which the securitization exposures associated with a securitization conducted during this period were wholly transferred to third parties.
3. Figures show cumulative totals for this period of underlying assets either in default or contractually past due three months or more arising from securitization transactions in cases where the securitization exposures associated with a securitization conducted during this period were wholly transferred to third parties, or where no exposure was retained at the end of this period from a securitization conducted during this period due to related maturity.
4. Losses with traditional or synthetic securitizations are based on the projected accounting losses for holding the underlying assets without conducting the relevant securitization. With regard to the sponsor of ABCP programs, since it is extremely rare for such schemes to result in losses on any related retained securitization exposure, it is difficult to obtain generally relevant information relating to losses as based on certain definitions. These figures therefore aggregate cases where actual economic losses have been recognized with cases where the loss has been valued on the same basis as the underlying defaulted assets. Losses on underlying assets relating to sponsor of ABCP programs differ from losses incurred by MUFG.

Notes: 1. The amount of securitization exposures that have been deducted from Tier 1 capital (amount equivalent to increase in capital) counts as common equity Tier 1 capital: regulatory adjustments as stipulated by Article 5 of the FSA Holding Company Capital Adequacy Notification, and includes any gains on disposal of the underlying assets relating to the securitization.

2. Figures listed refer to the amounts of exposures subject to a 1,250% risk weight as stipulated in Article 225 of the FSA Holding Company Capital Adequacy Notification. Securitization exposures subject to a 1,250% risk weight include cases where the credit risk-weighted assets computed using the Supervisory Formula Approach exceed 1,250% or where a rating is lower than a certain threshold when calculating credit risk-weighted assets under the Ratings-Based Approach.

**(Securitization exposures subject to early amortization provisions retained)**

In line with the provisions of Articles 230 & 248 of the FSA Holding Company Capital Adequacy Notification, as of September 30, 2017, there were no securitization exposures subject to early amortization treatment that are retained by external investors and are used to calculate credit risk-weighted assets.

#### Assumptions for VaR calculations:

Historical simulation method	
Holding period:	10 business days
Confidence interval:	99%

Stressed VaR has been measured from October 2011.

### The amount of required capital related to additional risk and comprehensive risk as of the period-end, as well as the maximum, minimum and average values for the amount of required capital for additional risk and comprehensive risk during the disclosure period

Not applicable in the first half of fiscal 2017.

## Movement analysis of market risk-weighted assets

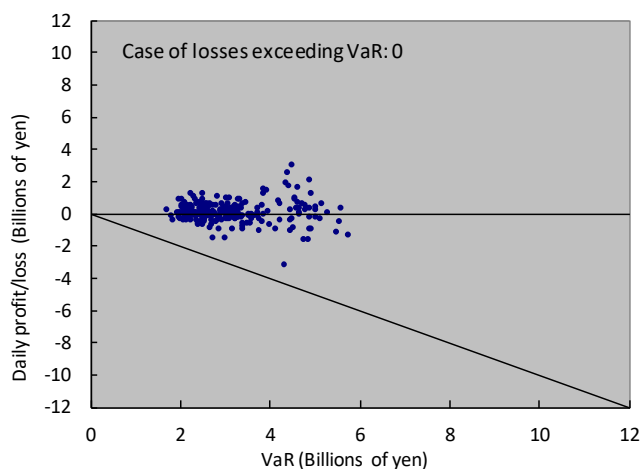

Market risk-weighted assets increased by ¥0.2 trillion from March 31, 2017 mainly due to increases in the VaR based on the Internal Models Approach and the equity position risk.

		<i>Trillions of yen</i>
