Important Issues Concerning Value Creation

How MUFG Addresses ESG Issues

Initiatives for Addressing ESG Issues toward Sustainable Growth

MUFG aims to help create a sustainable society and realize United Nations Sustainable Development Goals (SDGs) through its business activities. To this end, we have identified a number of environmental and social issues of concern at home and abroad and determined priority issues to be addressed by MUFG.

Currently, each business group has incorporated these priority issues into their business strategies and is pushing forward with initiatives to address them.

Endorsement of International Sustainability Initiatives

*1 Endorsed by the Bank  *2 Endorsed by the Trust Bank and Mitsubishi UFJ Kokusai Asset Management  *3 Endorsed by the Trust Bank
Important Issues Concerning Value Creation

Initiatives for Addressing ESG Issues toward Sustainable Growth

Aware of both opportunities and risks arising from ESG issues, MUFG is striving to help resolve environmental and social issues through its business activities.

As part of our mission as a financial institution, we have set Sustainable Finance Goals to contribute to the realization of international goals specified by the Paris Agreement* and those identified by United Nations SDGs. Moreover, we established the MUFG Environmental and Social Policy Framework aimed at providing guidance to our business activities.

* A multilateral international agreement on climate change that was adopted in December 2015 in Paris, where the 21st session of the Conference of the Parties to the United Nations Framework Convention on Climate Change (COP21) was held

Aiming to facilitate the creation of a sustainable society and realization of SDGs via its financial services, MUFG has committed to extending a total of ¥20 trillion for sustainable finance over a period spanning from fiscal 2019 to fiscal 2030 (of this, ¥8 trillion will be used for environmental finance).

As a driving force behind the dissemination of power generation projects, in these ways, we serve as a lender for solar, hydroelectric, wind and geothermal projects. MUFG is acting as project finance arranger and lead arranger in these fields.

MUFG recognizes environmental and social risks arising from operations undertaken by its Group companies as important management issues requiring serious attention. Based on the “MUFG Environmental Policy Statement” and “MUFG Human Rights Policy Statement,” the MUFG Environmental and Social Policy Framework is designed to ensure that due consideration is given to environmental and social issues in the course of its financing.*

In May 2019, we revised the policy framework, taking into account various external concerns, such as the international community’s call for more robust climate change countermeasures and stakeholders’ feedback on environmental and social issues. The revised policy framework includes more stringent restrictions on financing for the coal-fired power generation sector.

Going forward, we will regularly review this policy framework and upgrade it in a way that conforms with changes in business activities and the operating environment.

* Including the provision of credit and the underwriting of bonds and equities

Setting a Sustainable Finance Goals

Primary business fields eligible for financing

Environmental
- Businesses contributing to the popularization of renewable energy and the enhancement of energy efficiency
- Businesses contributing to the alleviation of climate change impact, such as green building projects

Social
- Businesses contributing to the development of startups and job creation
- Businesses contributing to the alleviation of poverty
- Businesses contributing to the improvement of local communities and regional revitalization
- Fundamental service businesses, including those involved in basic infrastructure such as public transport, waterworks, and airports, and essential services such as hospitals, schools and police

Promotion and Popularization of Renewable Energy

MUFG is acting as project finance arranger and lender for solar, hydroelectric, wind and geothermal power generation projects. In these ways, we serve as a driving force behind the dissemination of renewable energy around the world.

Thanks to these efforts, in 2018 we ranked first on the global private finance lead arrangers league table in the field of renewable energy project financing. We have held this position for three consecutive years.

We will achieve our Sustainable Finance Goals through these efforts.

Outline of the Revised Environmental and Social Policy Framework

Restrictions

- Coal-fired power generation sector
  - MUFG will not provide financing for new coal-fired power generation projects once the revised framework takes effect.
  - Exceptions may be considered where we will take into consideration the energy policies and circumstances of the host countries, international standards and the use of other available technologies when deciding whether to provide financing.
  - We also support the adoption of advanced technologies for high-efficiency power generation and Carbon Dioxide Capture and Storage (CCS) technologies that contribute to the reduction in the emission of greenhouse gases (GHGs).

- Restricted transactions
  - In addition to the coal-fired power generation sector and the cluster munitions manufacturing sector, forestry, palm oil and mining (coal) will be newly added to “Restricted Transactions”.
  - When financing is considered, we request our clients to certify the relevant operations according to internationally recognized certification organizations.

- Asset management business
  - In its asset management business, MUFG has established the MUFG AM Responsible Investment Policy concerning environmental and social initiatives.
  - The policy was prepared in accordance with the six Principles for Responsible Investment (PRI), based on our fiduciary duty to clients who entrust their capital to us.

Please also refer to a news release issued by MUFG on May 15, 2019 to see details regarding revisions to the MUFG Environmental and Social Policy Framework.
Initiatives to Counter Global Warming and Climate Change

Acutely aware of the importance of climate-related financial disclosure, MUFG has declared its support of relevant recommendations formulated by the Task Force on Climate-related Financial Disclosures (TCFD), a special taskforce established by the Financial Stability Board (FSB). In line with these recommendations, we are working to enhance the content of information disclosure.

**Goverance**

**MUFG’s Governance Structure for Countering Climate Change**

At MUFG, the Corporate Social Responsibility Committee operates under the Executive Committee regularly engages in the deliberation of the Company’s policies on and the status of initiatives to manage opportunities and risks arising from environmental and social issues, including climate change. Furthermore, the Risk Management, Loan and Investment and Credit committees also discuss specific themes associated with climate change. Moreover, we have positioned global warming & climate change among our environmental and social priorities. We are thus endeavoring to address these issues while giving due consideration to both opportunities and the risks arising from them.

**Strategy**

MUFG recognizes climate change countermefasures and other environmental initiatives as important management issues. In line with this recognition, we established the MUFG Environmental Policy Statement, which includes MUFG’s policies on climate change. Moreover, we have positioned global warming & climate change among our environmental and social priorities. We are thus endeavoring to address these issues while giving due consideration to both opportunities and the risks arising from them.

**Opportunities—Supporting the Transition to a Low-Carbon Society**

We serve as a finance arranger and lender for renewable energy projects while actively providing consulting services aimed at assisting clients in their climate change countermefasures as well as assistance in the issuance of Green Bonds. By doing so, we support the transition to a low-carbon society from the aspect of finance.

**Risks—Transition Risks and Physical Risks**

Clients to whom MUFG has provided credits may be exposed to risks arising in the course of the transition to a low-carbon society, such as stricter regulation and the introduction of low-carbon technologies (transition risks). They can also be exposed to risks arising from physical damage due to the growing occurrences of climate change-induced natural disasters and abnormal weather (physical risks). If these risks were to impact the clients’ businesses or financial conditions, MUFG’s credit portfolio would also be exposed to substantial risks.

In response, MUFG aims to carry out the quantitative assessment of climate change-related risks and, to this end, is working to assess carbon-related assets associated with its lending portfolio based on the TCFD recommendations. Furthermore, we formulated the MUFG Environmental and Social Policy Framework to accurately evaluate and manage environmental and social risks arising from our business operations.

**Status of Carbon-Related Assets (as of March 31, 2019)**

<table>
<thead>
<tr>
<th>Sector</th>
<th>Proportion in overall portfolio value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Energy</td>
<td>3.0%</td>
</tr>
<tr>
<td>Utility</td>
<td>3.6%</td>
</tr>
<tr>
<td>Total</td>
<td>6.6%</td>
</tr>
</tbody>
</table>

Note: Total value of lending amounts to ¥96.5 trillion.

* Based on the TCFD recommendations, MUFG has categorized the value of lending for the energy and utility sectors other than lending for renewable energy projects as constituting carbon-related assets.

**Scenario Analysis**

MUFG has started scenario analysis with the objective of assessing the impact of climate-change-related risks on its credit portfolio.

Based on the New Policies Scenario and the Sustainable Development Scenario (2°C Scenario) published by the International Energy Agency (IEA), we are working to quantitatively assess the financial impacts of transition risks. The scenario analysis methods used reference those applied in a pilot project led by the UNEP Finance Initiative in which 16 member banks participated with the aim of discussing and developing methods for climate-change-related financial information disclosure for the banking industry.

In addition, MUFG is a participant in Phase II of a pilot project launched in 2019 by the UNEP Finance Initiative.

**Risk Management**

We implemented MUFG Environmental and Social Policy Framework to manage environmental and social risks associated with our financing.

In May 2019, we revised this policy framework to live up to the growing call for climate change countermefasures from the international community. Specifically, we strengthened the policy on financing for the coal-fired power generation sector while adding forestry, palm oil and mining (coal) sectors as restricted transactions. From July 2019 we will not provide financing for new coal-fired power generation projects. As a result, we expect our credit balance associated with coal-fired power generation projects to decrease over the medium to long term.

**Metrics and Targets**

**Setting Sustainable Finance Goals**

We have committed to extending a total of ¥20 trillion for sustainable finance by the end of fiscal 2030 (of this, ¥8 trillion will be used for environmental finance).

**Reducing CO₂ Emissions Attributable to Our Business Activities**

To reduce the environmental burden attributable to our business activities, we are working to assess and reduce the environmental footprints of our operations, such as GHG emissions. In addition, the Bank has succeeded in reducing CO₂ emissions beyond its reduction target (reduced energy intensity index* in fiscal 2017 to 26.0% below the fiscal 2009 level).

**GHG Emissions**

<table>

</table>

* Domestic total for MUFG, the Bank, the Trust Bank, MUMSS, and NICOS.

Note: Total value of lending amounts to ¥96.5 trillion.

* Based on the TCFD recommendations, MUFG has categorized the value of lending for the energy and utility sectors other than lending for renewable energy projects as constituting carbon-related assets.
Environmental Initiatives

Leveraging Our Financing Functions to Promote Environmental Initiatives

Drawing on its solid track record, abundant know-how and extensive global network, MUFG is acting as project finance arranger and lender in a way that helps curb the impact of climate change. Moreover, we provide consulting services while assisting clients with the issuance of Green Bonds.

1 Contributing to the Expansion of the Green Bond Market

Green Bonds refer to a type of bond that limits the use of proceeds from its issuance to funding for renewable energy and other projects deemed to be helping preserve the global environment. MUFG is contributing to the expansion of the Green Bond market as an investor, underwriter, issuer and lender.

In addition, the Trust Bank is a leading institutional investor in Asia as well as one of Japan’s top Green Bond investors. Meanwhile, in fiscal 2018 MUMSS handled 18 domestic Green Bond public offerings as a lead manager and thereby commanded 29% of total underwriting amount. Among other domestic financial institutions, MUMSS thus boasts an unparalleled track record in this field.

As an issuer, MUFG has issued Green Bonds on a total of four occasions since the first issuance of U.S. dollar-denominated Green Bonds in 2016. Today, the cumulative total value of such bonds issued by MUFG amounts to approximately US$1.7 billion (as of March 31, 2019).

The net proceeds from MUFG Green Bonds have been allocated to Eligible Green Projects via the Bank (examples of such projects are described on the facing page). These efforts have contributed to both MUFG and MUMSS being chosen to receive awards from the Minister of the Environment at the Japan Green Bond Awards in the categories of Japan Green Impact and Japan Green Contributor respectively.

Allocation of Funds and Environmental Impact (as of March 31, 2019)

2 Introducing an ESG Evaluation System for J-REITs*

MUFG has developed a system for evaluating the asset management companies of J-REITs and their risk management companies, taking advantage of this system, we began striving to expand the J-REIT market. Specifically, Mitsubishi UFJ Research and Consulting carries out comprehensive assessments of ESG initiatives undertaken by J-REITs and the asset management companies, and rates them based on a five-grade scale. Loans to J-REITs that received sufficiently high ratings will be prioritized in the allocation of proceeds from MUFG Green Bonds. In fiscal 2018, MUFG has extended a total of ¥6.6 billion to J-REITs since the introduction of this system.

* Japanese-Real Estate Investment Trusts

3 Environmental and Social Risk Management Based on the Equator Principles

As a signatory to the Equator Principles (EP), MUFG Bank supports its clients’ environmental and social risk management by identifying, assessing and managing environmental and social risks and impacts associated with large-scale projects by undertaking due diligence in accordance with EP. As of March 31, 2019, 46 transactions were subject to EP review and reached financial close in fiscal year 2018 (preliminary figure).

4 ESG Management Support Loan

MUFG offers corporate loan products designed to evaluate and support clients’ ESG initiatives. Specifically, Mitsubishi UFJ Research and Consulting evaluates clients’ initiatives and scores them in tandem with Japan Credit Rating Agency, Ltd. (JCR), thereby providing clients with feedback on the challenges they must address.

Employing these products, the Bank collaborated with regional financial institutions in the development of a syndicated loan totaling ¥14 billion for Nippon Yusen Kabushiki Kaisha and Nagoya Railroad Co., Ltd. This syndicated loan is certified by JCR as being in conformance with the Green Loan Principles.

5 Consulting Services on Climate Change Countermeasures

MUFG supports the Joint Crediting Mechanism (JCM) a carbon credit system designed to supplement the Clean Development Mechanism (CDM) based on the Kyoto Protocol. With the Japanese government acting as an international advocate for this mechanism, MUFG provides consulting services aimed at supporting the formulation and commercialization of financing schemes for initiatives undertaken in developing countries to curb global warming. Drawing on its leading track record and experience in the field of CDM consulting, MUFG assisted a total of 12 JCM projects in fiscal 2018.

Going forward, we expect these initiatives to help realize a total reduction in GHG* emissions of approximately 55,000 t-CO2/year.

In addition, MUMSS has been commissioned by the Ministry of Economy, Trade and Industry (METI) to conduct a study on and act as a secretariat for climate change adaptation businesses for the third consecutive year since 2016. MUMSS also helped upgrade METI’s Climate Change Adaptation Good Practices by Japanese Private Sector while hosting a climate change adaptation forum. In this way, MUMSS is contributing to the promotion of adaptation businesses in the Japanese private sector.
Facilitating Social Development through Financing

MUFG aims to contribute to social development through financing, the primary function representing its business operations.

In particular, we provide services unique to MUFG to address such issues as the “aging population & low birth rate,” “business incubation & job creation,” and “social infrastructure & town planning.”

Supporting Corporate Growth

As a partner for its corporate customers, MUFG is well aware of the fact that their needs may vary widely due to differing levels of development.

Accordingly, MUFG optimizes its services to fit their individual needs, whether they are startups, growing corporations, mature companies or companies undergoing corporate rehabilitation.

Supporting Up-and-coming Businesses with Growth Potential

* Rise Up Festa

- **4 outstanding companies**
- **6 excellent companies**

Number of Seed and Series A corporations included in the fiscal 2018 Rise Up Festa

Investment in 3D-Mapping Technology for Autonomous Driving

In April 2019, Japan Infrastructure Initiative (JII)* invested ¥2.0 billion in Dynamic Map Platform Co., Ltd. (DMP), a company aimed at providing high-definition (HD) 3D roadmaps, an essential component supporting autonomous driving and other cutting-edge driving assistance technologies. DMP is expected to expand into North America while rolling out its technology to applications other than autonomous driving, with the aim of contributing to the realization of a safe and secure society with higher living standards.

The Bank also engages in financing that draws on the government’s subsidized investment program for regional revitalization, extending a total of ¥6.8 billion in fiscal 2018 under this program.

Accordingly, MUFG provides finance for a number of customers, with a total of ¥35.7 billion being extended in fiscal 2018.

Strategies

- **Promoting Regional Vitalization**
- **Engagement of All Citizens,** covering community, business and public support, as well as advice to help them get their projects on track. Our efforts focus on helping customers meet four basic targets under Japan’s plan for the Dynamic Engagement of All Citizens,* covering community, people and employment. Every year, this fund provides finance for a number of customers, with a total of ¥35.7 billion being extended in fiscal 2018.

Educational Initiatives by Age Group

- **Elementary, junior high and high school students**
  - Domestic and overseas branches welcome local elementary, junior high and high school students, offering them workplace experience programs. We also provide on-demand lectures at local schools.
  - MUFG Union Bank helps students at public high schools establish and run “High School Branches,” providing them with opportunities to learn about financial and economic management. We have been running an educational program aimed at helping junior high and high school students learn about stock investment. To date, a total of 4,000 students from 50 schools have completed this program.

- **University students**
  - We present lectures aimed at enhancing basic financial literacy and preparing students for the future economy.

- **Businesspersons**
  - For our corporate clients’ employees, we provide seminars dealing with such topics as life planning and asset management. In addition, our website provides a broad range of articles aimed at encouraging viewers to develop their interest in asset building in addition to quizzes and cartoons.

* A comprehensive strategic plan formulated by the Headquarters for Overcoming Population Decline and Establishing Local Economy in Japan (established by the Cabinet decision in September 2010). In response to the rapid decline in and aging of the population, the government has set ambitious targets such as “the realization of a safe and secure society in a way that takes advantage of characteristics of each region and our corporate DNA.”

Educational initiatives

- **Financial and Economic Education**
  - MUFG Union Bank helps students at public high schools establish and run “High School Branches,” providing them with opportunities to learn about financial and economic management.

- **Educational initiatives**
  - We present lectures aimed at enhancing basic financial literacy.

- **University students**
  - We present lectures aimed at enhancing basic financial literacy and preparing students for the future economy.

Nurturing Professionals Who Pursue Innovation in Challenging Environments

As we aim to deliver greater value to customers and society as a whole, we are striving to nurture professionals equipped with distinctive strengths in their areas of specialty as well as human relations skills to ensure that they are capable of succeeding on the global stage. In doing so, we encourage them to take on the challenge of driving innovation.

With this in mind, under the Medium-Term Business Plan (MTBP) we will step up the integrated management of our Group’s human resources around the world.

MUFG Human Resources Principles

The MUFG Human Resources Principles provide the basis on which the Group has built a human resources management platform that aligns with its Corporate Vision. These principles are:
- Shared Values
- HR Mission
- HR Vision
- HR Philosophy

For the full text of the MUFG Human Resources Principles, please also visit our corporate website. URL: https://www.mufg.jp/english/csr/policy/

Human Resources Strategy under the MTBP

To overcome the harsh environment, we will engage in human resources management aimed at supporting groupwide integrated efforts to achieve the objectives of the MUFG Re-Imagining Strategy.

Specifically, we are focusing on ensuring optimal staffing in order to match the competencies of our workforce to jobs while promoting staff exchanges that transcend the boundaries of Group entities, thereby assisting in the execution of business strategies under the MTBP. Furthermore, we are managing employees in Japan and overseas in an integrated manner, practicing more sophisticated human resources management on a global basis.

Taking advantage of the great breadth of operations handled by the MUFG Group, we introduced the Groupwide Posting System, which offers employees opportunities to take on their desired duties in a way that transcends the boundaries of Group entities. The holding company also instituted a new recruiting framework for securing candidates from a broader range of sources. With the purpose of helping highly skilled individuals pursue greater career success, this framework is designed to provide them with salaries in line with labor market benchmarks unconnected to our conventional pay systems.

Currently, revisions of human resources system are under way at key Group subsidiaries in Japan. This move is intended to nurture a greater number of professionals and ensure human resources management with performance-based assignment. For example, the Bank overhauled its human resources system in April 2019, introducing evaluation and training frameworks designed to support growth and employees’ ability to overcome challenges. Also, the Bank’s new human resources system is thoroughly focused on ensuring performance-based appointment and position-based pay. This is expected to achieve more transparent and fair human resources management that is acceptable to employees, encourages their self-development, and creates an environment where employees are satisfied with their daily work and able to continually challenge themselves in pursuit of innovation.

Securing Future Top Management Candidates

MUFG aims to practice a group-based, integrated management approach in regions around the globe and, to this end, seeks future candidates for top management who can lead its businesses accordingly. Having positioned securing such human resources as an important management issue, in fiscal 2018 we established MUFG University to provide special training programs for those in managerial positions or above.

MUFG University offers two different courses, namely, the “Next-Generation Leader Course;” which aims to secure the future leaders of MUFG, and the “Management Course;” which aims to help managers enhance their skills. The former welcomes candidates from among general managers and branch managers and instills practical viewpoints for corporate management while nurturing concept-building capabilities for developing novel financial businesses. This course also provides hands-on training based on an “assessment & coaching” approach aimed at helping candidates embrace a new mode of behavior and acquire other traits necessary for corporate management. Meanwhile, the latter course takes on personnel holding the position of Managing Directors, deputy general manager or branch manager, providing a liberal arts education aimed at enriching comprehensive ability and widening perspectives while implementing global leadership training.

Going forward, we will enhance the content of training programs aimed at helping participants acquire coaching and organizational management skills as we aim to nurture managers capable of aiding their staff members in realizing their full potential. Moreover, we will incorporate training for instilling digital literacy, which has become essential to today’s corporate management. In these ways, we will secure future top management candidates capable of leading MUFG’s corporate development.

Nurturing Human Resources Leading in Enacting Reforms

Securing Human Resources Who Drive Digital Transformation

We will recruit and nurture tech specialists who can spearhead digital transformation.

Specifically, we will expand the lineup of job-level based training programs aimed at helping employees acquire practical experience and enhance their digital literacy while proactively hiring digital experts equipped with sophisticated skills.

Enhancing Managers’ Coaching Skills

Today, MUFG is striving to create a sustainable and open minded organizational culture that encourages employees to take on the challenge of realizing innovation and renovation. To this end, MUFG’s managers must be good at drawing out the creativity of their team members and helping them realize their potential so that they can proactively take on higher goals. With this in mind, we will initiate a special program for general or branch managers to help them enhance their coaching skills. Looking ahead, we will roll out coaching education to existing training systems for coverage of an even broader range of job levels.

Overhaul training policies, conventional human resources management practices, and the entire human resources platform to support autonomous career development.

Key to social contributions: Environment / Social / Governance
Important Issues Concerning Value Creation
Social Contributions

Nurturing Global Human Resources

Today, MUFG Group has expanded into more than 50 countries around the globe, with approximately 53% of its entire workforce being accounted for by overseas employees (as of May 31, 2019).

With this in mind, we are employing a globally unified human resources platform to nurture professionals with diverse backgrounds and offer them greater career opportunities. This approach is expected to enhance our organizational strength. In taking this approach, we promoted a growing number of those hired overseas to managerial posts while preparing a multinational list of key managerial candidates, that is, being periodically reviewed to preclude any biases.

In addition, we regularly hold the Global LEAD Program, mainly for those in department head positions. Hosting diverse participants coming from the Bank, the Securities Business, krungsri, MUFG Union Bank and other Group entities serving various regions, the forum provides training aimed at helping them acquire essential leadership knowledge, embrace global perspectives and develop other fundamental global leadership traits.

Also, the Bank and the Securities HD have taken advantage of the globally unified human resources management platform to appoint managing director candidates from among those hired overseas. Regardless of the place of their hiring, promising candidates are assigned leading roles in the execution of global business strategies. By doing so, we also help them develop career track records encompassing a broad range of fields.

Proportion of Overseas Employees* 

As a result of the aforementioned initiatives, we have seen improved motivation among individuals hired overseas, and their drive is helping to facilitate positive competition among employees while expanding the pool of candidates. In short, our approach is creating a positive feedback loop, boosting our organizational strength. Today, a growing number of individuals hired overseas have been promoted to managerial posts. For example, 13 of these individuals, including four women, have assumed executive officer positions at the Bank (as of March 31, 2019).

Promoting Workstyle Reforms

MUFG is striving to develop a working environment that allows employees to thoroughly focus on assessing customer needs and deliver greater value. To this end, we are promoting workstyle reforms on various fronts.

To help realize more flexible workstyles, we encouraged location-free operations via, for example, the utilization of satellite offices while allowing a greater number of employees to work from home. In fiscal 2018, approximately 1,000 more Group employees began working from home (sum of figures for the Bank, the Trust Bank and MUMSS).

In order for the MUFG Group to realize innovation, the Group must create a workplace in which each employee can find his/her job rewarding. To this end, we implement annual Awareness Surveys encompassing all Group members and assess challenges they are now confronting. Findings from these surveys are widely utilized in the formulation and execution of human resources management policies.

Reducing Overtime Working Hours

In Japan, efforts are steadily under way to reduce overtime working hours. The Bank, for example, succeeded in reducing the ratio of employees who worked overtime of more than 60 hours per month from 4.3% in fiscal 2014 to 2.9% in fiscal 2018 by, for example, encouraging employees to stagger their working hours.

MUFG also believes that raising managers’ awareness is key to effectively facilitating the creation of an inclusive working environment and providing special training to achieve this end. We are therefore endeavoring to increase the number of managers who place sufficient focus on staff training, strive to ensure that their staff members feel their job rewarding and extend generous support to help them enhance performance.

Support for Balancing Work and Life Events

MUFG is working to create environments that enable both men and women to continue career development regardless of whether they are on pre-natal leave, parenting, or providing nursing care. In Europe, for example, we hold seminars through our employee network to help employees balance life events. The number of employees taking childcare leave is increasing year on year, and we hope that all employees will become more aware of efficiency and productivity. In this way, we support the participation of men in childcare. For example, in the Bank and the Securities Business, the percentage of men taking childcare leave is high; 84% for the Bank and 100% for the Securities Business. However, since men tend to take only short periods of childcare leave, we strongly recommend that men take childcare leave for about one month. In addition, the ratio of male employees among MUAP employees who took childcare leave stood at 36%.*

* As of fiscal 2017

Promoting Inclusion & Diversity

MUFG aims to ensure that all its employees, who boast a diverse range of backgrounds, work as one team and are allowed to maximize their individual potential and fulfill their career goals. To that end, we are helping raise their awareness while developing various programs to support them.

These efforts are focused on facilitating an appreciation of each other’s uniqueness and creating an inclusive workplace in which everyone can work in confidence regardless of religion, disability, sexual orientation or gender identity.

MUFG Union Bank was selected by Diversity Inc. as one of the Top 50 U.S. Companies for Diversity in 2018, and for the sixth consecutive year, MUFG earned a 100 percent score on the Human Rights Campaign Corporate Equality Index. Inclusion & Diversity will remain important principles at MUFG, as we continue to embrace the unique perspectives of our colleagues, communities, and clients.

In Japan, the Bank’s Marunouchi Head Office has in place a prayer room that accommodates various religious needs. Also, the Bank has distributed tablet terminals equipped with voice recognition software for employees with hearing disabilities.

Assisting Women with Career Development

In Japan, the Bank, the Trust Bank and MUMSS identified a mutual goal: raising their ratios of female employees in managerial positions to 24% by March 31, 2021. Moreover, we aim to identify top management candidates from among this employee group. Our measures to this end include training sessions designed to help candidates inspire one another, round-table meetings with executives and the provision of a mentoring system. We are thus striving to raise their awareness of corporate management.

Overseas, we set a goal of raising the ratio of female managers in the Group’s workforce in the United Kingdom by 10% by 2022 as part of our ongoing efforts to ensure gender equality and support women’s career development.

Please also refer to the Diversity Report for the detail of these initiatives. URL: https://www.mufg-jp/english/csr/employees/diversity_report/
Enhance Our Corporate Governance Structure

Fundamental Concepts
MUFG will aim for sustainable growth and the increase of corporate value over the medium- to long-term, in consideration of the perspectives of its stakeholders, including shareholders as well as customers, employees and local communities. MUFG will aim to realize effective corporate governance through fair and highly transparent management based on the guidance provided by MUFG Corporate Governance Policies.

Steps to Improve Our Governance Structure
Since its establishment, MUFG has worked to build a stable and effective corporate governance structure, putting emphasis on ensuring external oversight. In June 2015, MUFG transitioned to the “company with three committees” governance structure. The functions of oversight and execution in the holding company are separated, thereby strengthening the oversight function of the Board of Directors and the committee system has also been reorganized for more effective governance. In June 2017, two foreign nationals were appointed as directors. In June 2018, the total number of directors was decreased, with outside directors accounting for the majority of the Board of Director membership.

In line with the succession plan formulated by the Nominating and Governance Committee, in April 2019, MUFG appointed a Group CEO and, in June 2019, three outside directors and one director. Due to these appointments, nine out of the current 16 members of the Board of Directors are independent outside directors and include three women as well as two foreign nationals (from the United States and Thailand). With their backgrounds ranging from corporate managers, financial experts and lawyers to CPAs, the composition of outside directors is well-balanced in terms of specialty, region and gender.

Important Issues Concerning Value Creation

Upgrading the Governance Framework

Fiscal 2018 Initiatives

Following the transition to the “company with three committees” governance structure in June 2015, there was a significant decrease in the number of agenda items and the volume of materials for Board of Directors meetings. This was thanks to a review of agenda items and the Board of Directors’ operations as a whole, including meeting frequency.

Specifically, over the course of a period spanning fiscal 2015 through fiscal 2018 the number of agenda items was cut approximately 36%. Over the same period, the total page count with regard to materials provided to members was reduced by 28%. Thus, the time allocated for discussing single agenda items has increased. As a result, the average length of regularly scheduled Board of Directors meetings has almost doubled from three hours 16 minutes in fiscal 2015 to six hours 19 minutes in fiscal 2018. In addition, almost doubled from three hours 16 minutes in fiscal 2015 to six hours 19 minutes in fiscal 2018. In addition, the average length of one regular meeting has increased.

Main agenda items discussed by the Board of Directors in fiscal 2018 are listed at the bottom of this page. At one meeting with the theme “acquisition of the CFSGAM Group,” the Board of Directors benefited from input from outside directors with regard to post-acquisition management focused on identifying extant decision making processes at the acquired company and how to assess other key management information. They also contributed opinions on how to identify significant issues based on business-specific due diligence findings and suggested how to resolve them. Thanks to outside directors who contributed their specialist expertise, discussions by the Board of Directors were quite active.

Outline of Committees and Their Fiscal 2018 Initiatives

Nominating and Governance Committee

The Committee is composed of outside directors and the CEO, with an outside director as Chairperson. The Committee discusses matters related to the Chairman, Deputy Chairman, President, and other major management positions in the holding company or major subsidiaries, as well as corporate governance policies and frameworks in place at these entities, and makes recommendations to the Board of Directors. Of these, the Committee met seven times to discuss the appointment of the Group CEO candidate.

Compensation Committee

The Committee is composed of outside directors and the CEO, with an outside director as Chairperson. The Committee decides on matters associated with the compensation of directors and corporate executives at the holding company and its subsidiaries and makes recommendations to the Board of Directors.

Fiscal 2018 Status of the Board of Directors and Committee Meetings

Audit Committee

The Committee is composed of outside directors and non-executive directors, with an outside director as Chairperson. The Committee examines the execution of business by the Committee and corporate executives and prepares auditing reports. It also examines the business and financial situation of the holding company and subsidiaries, conducting fieldwork where necessary.

Risk Committee

The Committee is composed of corporate executives, outside directors and outside expert members, with an outside director as Chairperson. It mainly examines important risk factors, such as foreign currency liquidity risk, that may impact on business operations while paying close attention to cyber attacks and other significant IT risks in anticipation of Tokyo Olympic games, and submits its recommendations to the Board of Directors.

In addition, the U.S. Risk Committee has been in place from 2016 and operates under the Risk Committee.

Examples of Agenda Items Discussed by the Board of Directors in Fiscal 2018

- Business planning for fiscal 2019
- Reporting from C-Suite constituents
- Review of fiscal 2018 MUFG Group employee awareness survey results (including reporting on corporate culture-related initiatives)
- Reporting on progress of strategic investment in Bank Danamon
- The acquisition of the CFSGAM Group

- Revisions of MUFG Corporate Governance Policies and Committee Charters and Rules
- Revisions of Roles for the Board of Directors and Rules on Staffing
- Measures for enhancing shareholder returns and financial performance targets

* (*) Represents Chair of each committee

(MUFG Report 2019)
Roles Outside Directors Are Expected to Fulfill

At MUFG, outside directors are expected to fulfill the following six roles:

- Supervise executives’ duties from an independent and objective standpoint
- Exercise the oversight of conflicts of interest that may occur between MUFG and top management executives or MUFG and controlling shareholders
- Provide advice and other assistance to top management executives based on their experience and expertise
- Contribute to sustainable corporate development and medium-to-long-term growth in MUFG's corporate value
- Engage in timely and appropriate decision making in the course of deliberating investment and other management judgments via the careful examination of the reasoning behind the proposals and other information presented to them
- Sufficiently discuss matters reported or proposed by top management executives by requesting supplementary explanation where necessary and by contributing their opinions

<td></td>
<td></td>
</tr>
<tr>
<td>On the other hand, the evaluation also identified following issues needing to be addressed to improve the effectiveness of the Board of Directors’ operations: (1) agenda items must be clearly ranked by priority, (2) the corporate governance structure must be strengthened on a groupwide, cross-regional basis, for example, by stepping up the coordination of governance functions in place at Group companies at home and abroad, (3) the Board of Directors must incorporate external input from specialists in its discussions of strategic areas, and (4) corporate culture reform initiatives currently under way must be monitored more closely.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Facing a business environment and management challenges that are ever more complex, MUFG is formulating measures to address the aforementioned issues. By doing so, MUFG will enhance the Board of Directors’ quality of discussion, enabling it to speedup decision making and thereby resolve these challenges.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Evaluation Framework of the Working Practices of the Board of Directors’ Operation

Since 2013, MUFG has employed external consultants to evaluate the working practices of its Board of Directors. Each director is asked to fill in a questionnaire and is interviewed on such subjects as the composition of key committees, the quality of the preparatory materials assembled prior to each meeting, the content of discussions, the operations of the Board, the Board’s contributions, and the performance of executive members. The results of these questionnaires and interviews are reported to and discussed at the Nominating and Governance Committee and the Board of Directors.

In the course of the fiscal 2018 evaluation, interviews were undertaken in January and February 2019 and completed questionnaires collected. According to the evaluation, MUFG was successful in steadily upgrading its corporate governance structure, making ongoing progress despite the major challenges it is confronting as a global financial institution. In addition, the execution of the process leading up to the appointment of the Group CEO was evaluated as a best practice demonstrating how to handle a pivotal issue with thoughtful discussion that employs a broad perspective and exemplifying good governance in terms of how governance systems should actually function.
Utilizing Insights Offered by Outside Directors

We believe that insights offered by outside directors are essential to enhancing the content of discussions at the Board of Directors meetings. MUFG is striving to ensure that outside directors are given sufficient information about agenda items by providing them with materials and giving presentations before meetings. In addition, outside directors have opportunities outside the Board and committee meetings to intensively deliberate on the MUFG Group’s business strategies and issues. Moreover, we strive to secure robust communication between outside directors and MUFG’s managerial positions by holding special meetings on multiple occasions. Our efforts to increase opportunities for outside directors to understand MUFG’s business operations resulted in the enhancement of the quality of discussions at Board meetings, leading to a number of improvements in actual corporate governance functions. In fiscal 2018, we held Board Educational Sessions themed on subjects listed in the chart below.

Conference Regarding U.S. Operations

In fiscal 2018, these meetings addressed global issues faced by MUFG. Attendees engaged in lively discussion over topics such as compliance with anti-financial crime regulations and other regulations.

Going forward, in an effort to facilitate mutual understanding and develop an even stronger governance structure, we pledge to maintain robust communications.

Compensation System

MUFG has adopted a performance-based stock compensation plan for all directors, corporate executives, and executive officers (hereinafter referred to collectively as “recipients”) who serve at the holding company, the Bank, and the Trust Bank as well as the Securities HD. The introduction of this plan is intended to provide greater incentives for those individuals to maintain an awareness of the Group’s overall corporate performance, stock price and capital efficiency over the medium- to long-term when pursuing their duties.

In May 2018, MUFG carried out a partial revision of this plan, incorporating ROE and the expense ratio into evaluation indices for determining stock compensation and bonuses for directors. This revision was intended to increase the proportion of performance-based compensation and is expected to better harmonize our compensation system with shareholders’ interests while incentivizing recipients to contribute to medium- to long-term improvement in corporate performance.

Outline of Compensation System

Underlying Concepts and Objectives

MUFG's stance on the determination of compensation is focused on ensuring the steady implementation of its management policies as well as securing sustainable corporate expansion and medium- to long-term growth in corporate value. Accordingly, MUFG aims to better motivate recipients to contribute to growth in business performance not only in the short term but also in the medium to long term while discouraging an excessively risk-taking approach. MUFG also determines compensation by giving due consideration to the operating results, financial soundness and domestic and overseas regulatory requirements associated with these recipients. In addition, MUFG mandates that a highly objective and transparent system must be in place for the determination of compensation. The level of compensation may be adjusted in light of prevailing economic, social, and industrial trends, the business environment surrounding the MUFG Group, its consolidated business performance and the status of employment markets in the place where hiring is taking place. In the course of determining compensation, MUFG also refers to data gleaned via objective research undertaken by external specialists with the intention of setting it at a level appropriate to maintaining competitiveness.

Important Issues Concerning Value Creation
Global Advisory Board

MUFG has established the Global Advisory Board to function as an advisory body to the Executive Committee, and the Board holds regular meetings. The Global Advisory Board is made up of members from Japan, Europe, Asia, and the Americas who are external experts in areas such as corporate management, financial regulation, and government policy. They provide advice and recommendations on groupwide management, global governance, business strategy and other management issues from an independent standpoint.

Outline of Annual Meetings

In December 2018, MUFG held its sixth annual Global Advisory Board meeting. In addition to Global Advisory Board members, attendees included MUFG officers, directors, outside directors and representatives from overseas partner banks. Participants engaged in active discussion on a broad range of themes. Topics included risk factors that may impact MUFG’s business strategies and portfolio, U.S.-China trade tensions, the growth potential of and risks associated with emerging nations, European politics such as Brexit and the EU’s future, digitalization and the data business.

MUFG Global Partnership Conference

We held the third round of the MUFG Global Partnership Conference to facilitate the sharing of expertise and collaboration among partner banks and MUFG. Attendees included chairpersons, CEOs and other executives from partner banks. The conference focused on four themes, namely, “channel strategy,” “data-driven marketing,” “consumer finance risk” and “cybersecurity.” Attendees were able to discuss issues each is now confronting while exchanging insights.

In addition, a digital-themed breakout session was held with representatives from each partner bank. They discussed the priority measures they’ve taken and shared their know-how and case studies.
